

Programme

Thursday, 18 September 2008

- 09.00-09.30 Welcome Coffee
- 09.30-11.00 **Rick Chappell**
Semicompeting risks in survival analysis I
- 11.00-11.15 Coffee break
- 11.15-12.45 **Jianguo Sun**
Methods for interval-censored failure time data and beyond I
- 12.45-14.00 Lunch
- 14.00-16.00 Contributed papers
- 14.00-14.20 Parallel Session 1, Aud. A, chaired by **Noël Veraverbeke**
Auguste Gaddah
An extension of the Koziol-Green model under dependent censoring
- 14.20-14.40 **Jozefien Buyze**
Cross-over studies with survival outcomes
- 14.00-14.20 Parallel Session 1, Aud. B, chaired by **Ingrid Van Keilegom**
Lieven Desmet
Peak preserving spectral density estimation
- 14.20-14.40 **Rosa M. Crujeiras**
Testing separability with additive models
- 14.40-15.00 Parallel Session 2, Aud. A, chaired by **Catherine Legrand**
David Dejardin
Joint modeling of progression free survival and death
- 15.00-15.20 **Maarten Bekaert**
Estimation of marginal structural survival models in the presence of competing risks
- 14.40-15.00 Parallel Session 2, Aud. B, chaired by **Irene Gijbels**
Marek Omelka
Kernel estimation of copulas
- 15.00-15.20 **Stefaan Van Aelst**
Fast and Robust Bootstrap Inference
- 15.20-15.40 Parallel Session 3, Aud. A, chaired by **Leopold Simar**
Olga Reznikova
Efficient estimation of a semiparametric dynamic copula model
- 15.40-16.00 **Philippe Lambert**
Bayesian P-splines and the estimation of uni- and bivariate densities from grouped data
- 15.20-15.40 Parallel Session 3, Aud. B, chaired by **Stijn Vansteelandt**
Beatrijs Moerkerke
Optimal screening for promising genes in two-stage designs
- 15.40-16.00 **Fanghong Zhang**
Genomewide screening/association analysis on *Arabidopsis* for CIS-regulatory variation
- 16.00-16.15 Coffee break
- 16.15-17.30 **Jerry Lawless**
Modelling and analysis of recurrent events
- 18.30 Conference Dinner

Friday, 19 September 2008

- 09.00-10.30 **Jerry Lawless**
Gaps in methodology and recent research
- 10.30-10.45 Coffee break
- 10.45-12.15 **Jianguo Sun**
Methods for interval-censored failure time data and beyond II
- 12.15-13.30 Lunch
- 13.30-15.30 Contributed papers
- Parallel Session 1, Aud. A, chaired by **Els Goetghebeur**
- 13.30-13.50 **Bart Van Rompaye**
Adjusting for possibly misclassified causes of death in cause-specific survival analysis
- 13.50-14.10 **Manoochehr Babanezhad**
Comparing IV-estimators for the causal effect of exposure on a dichotomous outcome
- Parallel Session 1, Aud. B, chaired by **Iven Van Mechelen**
- 13.30-13.50 **Anneleen Verhasselt**
Nonnegative garrote in additive models using Psplines
- 13.50-14.10 **Joachim Vandekerckhove**
Applying the Wiener diffusion process as a psychometric measurement model
- Parallel Session 2, Aud. A, chaired by **Kris Bogaerts**
- 14.10-14.30 **Cristina Sotto**
Weighted vs multiple imputation based estimating equations for longitudinal binary data
- 14.30-14.50 **Jose Cortinas Abrahantes**
Simplified modeling strategies for surrogate validation for multivariate failure-time data
- Parallel Session 2, Aud. B, chaired by **Stefan Van Aelst**
- 14.10-14.30 **Zita Oravec**
Estimation of a bivariate hierarchical Ornstein-Uhlenbeck model for longitudinal data
- 14.30-14.50 **Alexandra.Daskovska**
Forecasting the Malmquist Productivity Index
- Parallel Session 3, Aud. A, chaired by **Emmanuel Lesaffre**
- 14.50-15.10 **Niel Hens**
A simulation-based assessment of the correlated frailty model for bivariate data
- 15.10-15.30 **Kris Bogaerts**
Estimation of the association for bivariate interval censored data with copulas
- Parallel Session 3, Aud. B, chaired by **Paul Janssen**
- 14.50-15.10 **Johan Segers**
Tails of multivariate Archimedean copulas
- 15.10-15.30 **Liesbeth de Wreede**
Competing risks and R
- 15.30-15.45 Coffee break
- 15.45-17.15 **Rick Chappell**
Semicompeting risks in survival analysis II
- 18.30 Dinner and Ghent by night

Saturday, 20 September 2008

- 9.00-12.30 Guided visit of Ghent
- 12.30 Lunch
